

WHO WE ARE

The Child Life Action (CLA) was founded in November 2021, at the period of time that children face unprecedented issues round the world. The most fragile and poorest communities; the most excluded & discriminated populations have a greater risk to see their fragile youth suffering from the consequences of several global crises the world is facing. CLA founders decide to unite their strengths for leveraging financing and providing technical expertise to child related projects and programs where their education is lacking the basic needs in highest burden countries.

"Obtaining a quality education is the foundation to improving people's lives and sustainable development"

Given the cross-cutting and holistic method adopted by CLA; it is only with a human rights-based and collaborative approach that its mission is intended to success. Thus, projects and programs are designed, developed, and implemented with trustful partners both globally and locally.

Child Life Action

Every Action Counts

Address: CLA – 1200, Geneva
Contact: contact@childlife-action.ch
Website: www.childlife-action.ch

WHAT WE DO

At CLA, our goal is to effectively address the obstacles to quality education, ensuring the realization of Human Rights to water, sanitation & hygiene in schools with a specific attention to girls' specific needs; raise, catalyze and invest resources to accelerate the access to technology in schools for children with the highest burden and lowest ability to respond

"The COVID-19 pandemic has demonstrated the critical importance of sanitation, hygiene, and adequate access to clean water for preventing and containing diseases"

OUR COMMITMENT

Child Life Action is committed to act for lives of children, worldwide. If programs and projects are intended to be implemented in low and middle income countries within deprived communities; there are activities that can be held in Geneva or in any other destination. The everyday more globalized world we are building, the welcoming of refugees due to conflicts, natural disasters, or economic crisis, have led to bring together children from different cultures.

CLA commits to dedicate time and energy for helping the children, organizing punctual activities enabling to provide a safe space for cross cultural exchanges amongst children, presenting CLA's activities and collecting funds. This kind of activities is part of CLA's will of building links and peaceful dynamics between children from different horizons.

OUR PRINCIPLES

- Serving children from communities left behind
- Accountability and transparency.
- Collaboration, Complementarity and Partnership for high quality delivery
- Efficiency and value for money

OUR STRATEGY

The CLA's target is to realize reasonable activities at first, using its agility proper to a Non-Governmental Organization, modest resources -human and financial- and the strong experience in humanitarian affairs of its founders and members. This strategy set CLA on a course for working for children from poor communities and disadvantaged groups, improving their health and well-being with a decent quality of education through sustainable access to water and sanitation and affordable energy.

"Research and innovation are successful when incorporating civil society, academia, and private sector together with specialized UN agencies work on concrete and relevant projects"

SUPPORTERS

Building partnership and collaboration with key partners is the essential frame for all CLA activities. Every step will aim at strengthening partnerships with governments, civil society, specialized agencies, academia, private sector, donors. Through these collaborative partnerships, CLA hope to bring sustainable solutions and contribute to enable the acceleration of SDGs across different sectors and their related goals affecting children's lives and education.
